

## Marion Meadows

Marion Meadows will take you on a journey of photography and art. Let your imagination run wild. MM Photo Works is an extension of the creative mind of jazz musician Marion Meadows. Marion never stops thinking of new ways to express himself artistically. His photographic and graphic canvas now rival his musical one. Both music and art are a way of life, and he continues to defy the rules of gravity by completely letting go.

Marion's love of visual art started when he was a young boy growing up in Stamford, CT. His mom bought him a paint set and he started dabbling in oil. He later took up photography as a hobby and eventually would go on to study graphic design all while studying to be a professional musician. Meadows often credits his broad love of everything artistic as being the fuel that stokes his imagination.

Meadows now spends his time creating mixed media art comprised of his own photography and graphic manipulation. His work is vibrant and expressive with a hint of nature's social order along with a love for Humanity.
