

## Construction Activities Update – June 28, 2017:

Eversource has made substantial progress in its construction activities for the Stamford Gas Reliability Project which began in July 2016.

To date we have installed 5,130 feet of underground gas main infrastructure and installed 67 gas service lines. The gas mains and service lines on Bedford Street between Spring Street and Broad Street have been completed. We have also completed all construction street work within the restaurant district on Bedford, Atlantic, Federal, Main and Bank Streets.

Final restoration is currently underway and we anticipate to being completely done by July 31, 2017. Remaining construction activities includes individual service line installations; final paving and working with property owners regarding the installation of vent covers along (Bedford and Atlantic St.). Additional construction activity is also planned along Quintard and West Park Street; and North State Street and Atlantic Street.

We know that maintaining strong relationships with our community partners is vital to the successful completion of this project. We appreciate the close partnership we have had with the City of Stamford, the Downtown Special Service District and local residents and business owners over the past year during this project.

Eversource respects the integrity of the properties in the communities where we work. Should anyone have any outstanding issues regarding our work on this project, please contact Greg Woloszyn directly at 203-854-6455.

### Additional Information:

Eversource remains committed to providing reliable service as well as accurate and timely information. Keeping the lines of communication open is an important part of our work in your community.
