

September 28, 2017

Dear Resident,

Delivering safe and reliable energy to you is Eversource's top priority. In keeping with that commitment, Eversource is improving the natural gas distribution system in the following locations in downtown Stamford:

- Summer Street

Work will be conducted between 8 AM and 5 PM starting September 30, 2017 and continuing through October 31, 2017. We've been working closely with the Town of Stamford Officials and the Stamford Downtown Special Services District Officials and will continue to do so through all phases of work. Since this project will include excavation activities, traffic impacts, and temporary interruptions to your natural gas service, we want you to be informed of our efforts.

**What You Can Expect**

Working together is important to the successful and timely completion of this project. The Danella Construction Corporation of Connecticut will be performing the work on behalf of Eversource in your neighborhood. All Eversource employees, contractors and field representatives carry identification that you can ask to see at any time. Our work is weather dependent and construction activities are subject to change.

Depending on the existing conditions at your residence or business our work may involve moving natural gas meters outside, replacing your existing gas service line, and installing curb valves at the street. There may also be other upgrades required to ensure the safe and most efficient operation of the natural gas distribution system.

This work may result in temporary interruptions to your natural gas service. Be assured that prior to any interruption, you will be contacted in advance by a letter, phone call or door hanger so that you and members of your household can plan accordingly. We will do our best to minimize any inconvenience caused by this project. After any gas service interruption, Eversource representatives will be on site to turn your meter back on and re-light your appliances.

**Our Commitment to You**

We are committed to being good neighbors and performing our work with utmost respect for you and your property. As construction professionals, we also know that living within a work zone can be challenging and we will do our best to minimize any disruption you may experience.

**Need to Contact Us?**

If you have any questions or need any additional information, please contact me directly at 479-973-3332 or [heather.adrian@eversource.com](mailto:heather.adrian@eversource.com). We thank you for your patience and cooperation as we work together to complete this gas system improvement project.

Sincerely,

*Heather L. Adrian*

Gas Construction Supervisor
