STAMFORD DOWNTOWN BANNER PROGRAM REDESIGN

Over the past year, Stamford Downtown has undertaken the process to redesign its banner program. Stamford Downtown circulated a Call for Artists to identify new artwork with the intent of using the latest iteration of the banner program to transform light posts within Downtown into a public art gallery. The selected artists include Nancy Anderson & Michael Lombardo of Creative Insight; Jessica Mateo, Aisha Nailah; and Jahmane West. In total, Stamford Downtown will produce 320 banners ranging between 3 feet – 8 feet in length. These banners will reflect five different designs. Stamford Downtown will locate most of these banners along 10-foot and 12-foot decorative light posts along Bedford Street, the Main Street/Columbus Park corridor, and Atlantic Street. Stamford Downtown chose these locations to concentrate the banners within downtown’s most-heavily trafficked, pedestrian corridors. Focusing the banners on these shorter, decorative light posts will make them more visible to pedestrians and allow Stamford Downtown to more expeditiously repair or replace any damaged banners or bracket assemblies. The City of Stamford will assist Stamford Downtown by installing the banners during the course of the Summer 2023.
